Error code

Error: Could not get any response

You haven't imported the environment file, or you've imported it but haven't selected it from the dropdown. Please follow the the steps above to import and select the environment in Postman.

Error: API-key format invalid.

Likely causes:

- Your API key is not set.
- Your API key is not correct.
- You have not selected X-MBX-APIKEY in your Postman Headers.

Error: Signature for this request is not valid.

Likely causes:

- You haven't set your secret key.
- You've selected parameters for which no value was passed. If you aren't using a parameter, uncheck it.

Error: Mandatory parameter 'xxxx' was not sent, was empty/null, or malformed.

Your request is missing a parameter that the API requires. Please refer to the API documentation, and pass all mandatory parameters in your requests.
